

Amendments to the Claims:

This listing of claims replaces all previous version or listing of the claims:

1. (currently amended) A barbecue device, comprising:
a tray supporting combustible material including at least one refractory member adapted to store heat and a catch disposed adjacent said refractory member;
a grill disposed above said tray and being connected thereto by a lifting member, said lifting member including a bar slidably received in an outer cylinder,
whereby actuation of said bar with respect to said outer cylinder adjusts the height of grill with respect to said tray.
2. (currently amended) A barbecue device according to claim 1, wherein
a gear engages said bar; and
said gear being connected to a lever so that rotation of said lever actuates ~~rotates~~ said gear to move said bar when adjusting the height of said grill with respect to said tray.
3. (original) A barbecue device according to claim 1, wherein
a plurality of a refractory members are disposed in said tray with spaces located between said refractory members allowing air to flow between said refractory members.
4. (original) A barbecue device according to claim 1, wherein
said tray includes an astray having a handle, and adjustable leg members.

5. (original) A barbecue device according to claim 1, wherein
said grill is horizontally fit between a longitudinal support in angular guides disposed
substantially perpendicularly to said support.

6. (currently amended) A barbecue device, comprising
a tray supporting combustible material and including at least one heat source means
for retaining heat of the combustible material and a spacing means disposed adjacent said
heat source means; and
a grill disposed above said tray and being connected thereto by an adjustment means
for adjusting the height of grill with respect to said tray.

7. (original) A barbecue device according to claim 6, wherein
said heat retaining means is a brick.

8. (original) A barbecue device according to claim 6, wherein
said heat retaining means is a plurality of bricks.

9. (new) A barbecue device according to claim 1, wherein
said tray supports a plurality of refractory members; and
said catch is disposed between two of said refractory members.

10. (new) A barbecue device according to claim 9, wherein
said refractory members are disposed in a plurality of spaced rows; and
said catch is disposed between two of said rows.

11. (new) A barbecue device according to claim 6, wherein
said heat source means includes a plurality of refractory members; and
said spacing means provides space between said refractory members.

12. (new) A barbecue device according to claim 11, wherein
said spacing means is at least one catch.
